

Installation Guide – Gastropod / Byvalve Data Entry

Created by – 2025.05.19

1. Select the provided APK file. When a pop-up message appears, tap 'OK' to proceed. You will then be redirected to the app interface. Then you will get Allow Location pop up message you can give 1."While using this app" or 2."Only Thise Time".

2. You must fill in all the required fields listed below. If any required field is left empty, a 'Validation error' message will be displayed, and the form cannot be submitted.

- a.Date
- b.Team Members
- c.Time of data collection
- d.Nearest High Tide Time
- e.Time of Sampling

f.Location

g.Weather Information

h.Sampling Information

i. Quadrat Information, Transect Information, or Peterson Grab Sampling Information.

(Enter the relevant information based on the selected sampling method)

j.Habitat Information

k.Species seen clumped Information

l.Water Information

The screenshot shows a mobile application interface with a list of species and their corresponding input fields. The species listed are *Gelonia coxans* (GC), *Magallana belcheri* (MB1), *Magallana bilineata* (MB2), *Martesia striata* (MS), and *Ballanus* sp. (B). Each species has an "Enter count" input field. A "Validation Error" dialog box is displayed in the center, stating "Please correct the errors in the form." with an "OK" button. At the bottom, there is an "Upload a Photo" section with a camera icon. The status bar at the top shows the time as 07:44 and battery level at 90%.

07:44 90%
